Message from the Managing Director

« In Pursuit of Excellence »

Since the very early days, it has always been our firm belief that the pursuit of excellence is the best guarantee of success. This philosophy led us to invest in modern equipment to be able to promote new services that we knew would enable us to become self sufficient and maintain the highest standards at all times.

As the activities of the firm expanded, we never lost sight of this basic belief. We successfully absorbed all the new developments that were transforming the haulage industry abroad, and we feel proud that we were one of the first companies on the Island to reach this target.

It gives me great pride to represent a firm that is undoubtedly at the forefront of this great industry. Over the years we have built a reputation that reflects the company dynamism and complete dedication of all its members. Our numerous achievements have always served us as an added stimulus to discover methodologies that are both more efficient and cost effective, thus affording a better service to our esteemed clients. The long and fortunate association with International Shipping Companies has given us a wealth of experience that our dedicated team succeeded in transforming into an immense asset for our company.

It is our strong resolve that this 'Pursuit of Excellence' will continue to be the backbone of our philosophy. Judging from our past record, this 'basic belief' will continue to bear fruit and keep us at the helm of progress.

The Managing Director.
